Overview

This guide is to help you get the most out of this program and to quickly be able to begin to apply your newly discovered skills.

Also, there is a sizable amount of material in this program, so we want to help you know what is the best path for you to take it all in.

We realize the people who purchase this program have a variety of skill levels. Some have had some hypnosis experience, and some have not. Some know the Masterful Lover materials and some don't.

Depending on which category you fall in, there is a path through the program which will be optimal for you.

One more thing... this is important.

If you do not currently have a lover to use your new hypnosis skills with, listen to the *"How to Find People To Practice Hypnosis"* bonus.

You can start implementing the strategies to find people who are interested in hypnosis now so when you are ready to practice, you have partners.

Do the drills, get the skills.

Enjoy!
